The following Design for Manufacturability (DFM) review is based on the documents provided for the above listed program. It is provided in a Hot/Warm/Cold format, and is based on the current manufacturing guidelines, processes and procedures at Sunburst Electronics.

**HOT - Items that have a direct, significant impact on the cost of the product, and should therefore be considered strong candidates for change whenever possible.**

---

---

---

---

---

---

---

---

---

---

**WARM - Items that have moderate to small impact on the cost of the product, and should be considered for change at the next revision change**

---

---

---

---

---

---

---

---

---

---

**Cold - Items that may or may not have any impact to the cost, however may improve the product's overall quality opportunity, cosmetic appearance or relate to long term material availability. This category is also used to insure note is provided for correction to previous revision problems.**
